

*Merlinus Anglicus Junior:*  
OR THE  
STARRY MESSENGER.

For the Year of our Redemption, 1692.  
And from the Creation, according to Sacred Writ, 5641.  
Being Bissextile, or Leap-Year.

Wherein<sup>o</sup> is contained, (1) *Astronomical* and *Meteorological Observations*. (2) The State of the Year, deduced according to ART, from the Solar Ingresses, Eclipses, various Configurations, Aspects and Conjunctions of the Planets. (3) The *Rising* and *Setting* of the Sun and Moon: Also her *Southings*; Together with many usefull Tables pertinent for such a Work, Accommodated to the Meridian of London; which lies in the *Latitude* of 51 deg. 32 min. North, but may indifferently serve (without sensible Error) for any other part of *Great Britain*. To which is added *Monthly Observations* and *Astrological Predictions* (or *Conjectures*) upon the whole Year, &c. Also an *Ephemeris* of the *Diurnal Motions* and *Aspects* of the Planets; together with a *Table of Houses* for the aforefaid *Latitude*, &c. the like (in all particulars) not extant.

By HENRY COLEY, Student in the *Mathematicks*, and the *Cælestial Science*.

The One and Twentieth Impression.

*Alius alio plura invenire potest, Nemo omnia.*

*And he changeth the Times and the Seasons, he removeth KINGS, and setteth up KINGS, he giveth Wisdom to the Wise, and Knowledge to them that know Understanding, Dan. 2. ver. 21.*

L O N D O N,  
Printed by John Heptinstall, for the Company of  
Stationers, 1692.

## To the Candid READERS.

Gentlemen!

**T**HIS is the One and Twentieth Year of my Appearance to the World, in this kind, amongst the rest of my Brethren; whose good Fortune in their happy Conjectures, and General Practice Mathematical, I no ways Envy; for I have always hitherto desired to live at peace, and ever shall, whilst I am in the Land of the Living, presuming no Man will Quarrel with my Ashes when I am Dead. I thank God I live free from Prejudice against any person Breathing; and therefore give no just cause to provoke their Envy or Calumniation. — 'Tis a dangerous kind of Baldness for any Man to appear abroad in the World as an Antagonist; and he must certainly expect to be severely judg'd himself, that takes upon him to censure and condemn others: For we know well —

All Men have Faults, from whence what e'er we doe;  
Our Works are Humane, thence Erroneous too.

If Errours at any time happen in our Calculations, or Mistakes in our Conjectures, 'tis, Non ex Scientiæ Imbecillitate, sed Professorum; Not from any Uncertainty or Weakness in the Art, but oftentimes from either the Knavery, Negligence, or Ignorance, of the Professors. No Man would willingly be deceived, yet few are able to Protect themselves from Error; but we may boldly write or speak any thing of a Person, if he be but convinc'd before that we Love him; according to that old Adage, Ama & dic quod vis. Let us learn so Live peaceably and Love one another, and unanimously joyn only against the Common Enemy; for we see no Detriment is thought so formidable and injurious to a Malicious Mind as the Prosperity of an Adversary. I have this Year, according to my usual Custom, presented you with (instead of Nuncius Siderius) a Merlins Junior, the Matter is much the same, and the very same Method, tho' the Title be chang'd (for a Father may give his Child what Name he pleaseth) yet is it but the same I formerly us'd when I publish'd my worthy friend Anglicus Mr. W. Lilly: which is now Discouraged to make Room for the Labours of a friend who has taken much pains to Oblige the curious, and I wish we had more such true Lovers of Urania: But it is indeed impossible that one Age, or one Man, should perform all things requisite to this Science: Many things are impossible to be found out, and many other things therein are Reserv'd to after Ages. To conclude, I know our Censures are as various as our Palats; That, which one Admires, another rejects, and all persons Writings are approv'd as Mens Fanciet are inclined. The more Words the more Faults, is said to be a Divine Maxime; whatever you like, be it so, please your selves, quicquid liber licet; till the next Year (if God permit) Farewell. Gentlemen,

From my House in Baldwin's

Court in Baldwin's-Gardens.

Your Friend and Servant,

HEN. COLEY.

A Cunning Knave, that knows the Querks of Law,  
Will no more value, than he does a Straw:  
When you Arrest him, He will Laugh at all  
Those Troubles which on other Men befall.  
And he, through all the Godweb-Laws Escapes,  
Varying his Tricks as Proteus did his Shapes. [Hor. Sat.]

King William and Queen Mary Crown'd April 11. 1689.—

*Whom God grant long to Reign for the Good of England.*

Sacred is the Name of KING, and Full of Splendor,

Great is the Title of our Faiths Defender:

Stand there, Great WILLIAM, in Successive Might

Our King by Miracle, as well as Right:

Let Him victorious be, and still advance,

And end His Conquests in the Heart of France.

Now let all Loyal Subjects thus conclude,

May Caesar Live, and never be subdu'd.

"Heavens bless Your Majesties, encrease Your Powers,

"No Happiness to that, of being Yours.

January hath xxxi days.

King Account

*Excellent Philosophical Discoveries, continued, &c.*  
If the *Earth* were alone, that is to say, not affected by the Actions of the *Sun* and *Moon*, it is not to be doubted but the *Ocean*, being equally press'd by the force of *Gravity* towards the *Center*, would continue in a perfect *Stagnation*, always at the same height, without *ebbing* or *flowing*.

*Fiat voluntas Dei.*

A 4

February hath xxix days.

But it being not to be denied that the Sun and Moon have alike Principle of Gravitation towards their Centers, and that the Earth is within the Activity of their Attractions, it will plainly follow that Equality of the Pressure of Gravity towards the Center, will thereby be disturbed, and the smallness of these forces in respect of Gravitation.

*Pax optima rerum.*

The last Months Configurations have still Operation in this, and this is Usher'd in with an Invisible Eclipse of the Sun as the last concluded with an Invisible Eclipse of the Moon. Certainly about this time very superlative Actions are apparent amongst our Superiours, all tending to future Concord and Harmony; and in order thereunto, many Addresses are made, and some Equivocal Agent Miffive, or Ambassadors, is very active. Great Expectations of some notable thing to break out. Plenty of News arrives from Foreign Nations of very notable things now Transacted. In fine, the Month produces much more pleasing News towards the conclusion thereof, than at the beginning. God direct our Governours in their great and serious Councils.

*Pax Justitia.*

*Note, that the Roman Account is always 10 days before the English, so that their 11th day is our first, &c.*

March hath xxxi days.

Long Account Towards the Earth's Center, renders them altogether imperceptible, by any Experiments we can devise; yet the Ocean being fluid, and yielding to the least force by its Rising, shews where it is less press'd, and where it is most press'd by its sinking.

*Iustum Bellum quibus—  
Necessarium.*

Peace continues still in *Tasarus*, the *Horoscope* of *Ireland*, which promises in *Starry Dial*, once more, a happy *Reduction* of that unfortunate Country—We know there is too often a Necessity for War, and we have heard of too much thereof of late years in most places of *Europe*, but now I have great hopes the spirits of the *Grandees* thereof incline to Peace and a quiet Repose—God grant we may find it so. But Religious Disputes and Controversies we must still expect—and it will be so—for we are for one thing to day, and another *Novel* to morrow, too many of us, so that divers amongst us, here even in *England*, Live and Dye, and never come to any Resolution. But let us not be wise to deceive our selves. Now pleasing News from several Parts of *Europe* may be expected.

*Nihil Timendum.*

April hath xxx days.

Now if we suppose the force of the Moon's Attraction to decrease as the Square of the Distance from its Center increases (as in the Earth and other Celestial Bodies) we shall find that where the Moon is perpendicularly either above or below the Horizon, either in Zenith or Nadir, where the force of Gravity is most of all diminished.

*Non nobis nati sumus, &c.*

The Planet Saturn continues all this year and the next 1000 in the Sign Sagittary, opposite to the Horoscope of the Metropolitain City of London, whom God preserve from all manner of Danger and Calamities of any kind. Good News arrives to the Merchants thereof this Month from the happy Conjunction of *Jove* and *Mercury*; but the Opposition of *Venus* and *Chiron*, Menaces a great Lady or Dutches with Death or Disgrace. The Opposition of *Saturn* and *Mercury* at the end hereof, threatens some busie Mercurial person or persons with considerable Detriment and Mischance. Now let the *Clippers* and *Coyers* of this Age look about them, and such as frequently broach false News out of ill Design—For now also many of them will be met withall, and receive their Reward.

*Mendacii Pater Diabolus.*

May hath xviij. days.

And consequently that there the *Orrery* must necessarily swell by the Coming in of the Water from those parts where the pressure is greatest, *viz.* in those parts where the *Moon* is near the *Horizon*, as may easily be demonstrated; which rightly understood, it follows plainly that the *Moon* must form it self into a *Spheroidal* or *Oval* Figure.

June hath xxx days

Whole length Diameter is where the Moon is vertical, and  
shortest where she is in the Horizon; and that the Moon  
changing her Position, as she turns round the Earth once a  
day, the Oval of Water shifts with her; occasioning  
thereby the two Floods and Ebbes observable in each day  
twice.

# July hath xxii days.

And this may suffice as to the general cause of *these*. It remains now to shew how naturally this Notion accounts for all the particulars that has been observ'd about them; so that there can be no Room left to doubt but that this is the true cause thereof.

Male	High	Color	Appear.	Astronomical Conjectures,
Grand Set	W. B. B.			or Observations.

Many are the configurations of this month, amongst the rest, the late *Opposition* of *Saturn* and *Mars*, must not be forgotten. It reaches many parts of *Europe*; amongst the rest, *Italy* and *Rome* it self is not exempted, for it may disturb both the *Conclave* of *Excardinals*, and his *Holiness* himself, of which we may expect full intelligence. God preserve our *Metropolitan City* from all manner of disasters, and the *Inhabitants* thereof in general. The *Merchants* are in great expectation of hopeful returns, and towards the end of this month 'tis very probable that an *Ambassador* may arrive, or some *Agent* or *Adviser* to congratulate our *Sovereigns*, and at the same time, many worthy Persons meet preferment, and are put in places of *Trust* and *Advantages*. And thus the way to perfection is to change for the better, whilst others to their prejudice are strangely overwhelmed with their inordinancy.

*Post tenebras spero Lm. emf.*

**AMERICAN BORN AND BRED.**

The Spring-Tides upon the New and Full Moon, and Neap-Tides on the Quarters, are occasion'd by the Attractive force of the Sun in the New and Full, conspiring with the Attraction of the Moon, and producing a Tide by their united Forces; whereas in the Quarters the Sun opposes the Water where the Moon draws it.

Conjunctions & Aspects.

The Month begins with a quadrat of Saturn and Mercury, as if very sharp Libels or Pamphlets were now intended, & dispers'd secretly to abuse Authority, or some persons of Note amongst us. I hope no more plotting to torment us. The very name of *Papery*, seems Odious, and is more and more detested. Now matters appear in reasonable good Order, to the general Satisfaction of the whole Nation. And the French King does no great things with all his Potency and Stratagems. Pleasing news arrives from Foreign Parts, and very notable things are now in Agitation, yet the vulgar sort are too apt to repine, and perplex themselves with discontent, and complain for want of Trade, &c. I have some Reason also to fear a sickly Summer. Let the Guardian Angel of the City of London, ever protect the same. Amen. B 3

# September hath xxx days.

And the contrary, so that the Tides are made only by the difference of their *Magnitudes*. That the force of the Sun is no greater in this Case, proceeds from the very small proportion the *Semidiameter* of the Earth bears to the vast distance of the Sun. It is also observ'd from the same Reason the *Aequinotial Spring-Tides*.

# October hath xxxi days.

In March and September, or near them, are the highest and the Neap-Tides the lowest, which proceeds from the greater Agitation of the Waters, when the Fluid Sphaeroid revolves about a great Circle of the Earth, then when it turns about in a lesser Circle; it being plain that if the Moon were confituted in the Pole, and there stood.

November 1692.

D/ॐ रि।० रं

First Quarter the 5 day at 6 afternoon.

Full Moon the 13 day at 11 at night.

Lat Quarter the 21 day at 6 in the morn.

New Moon, the 27 day at 11 at night.

From whence the eclipses of the Moon proceed.

And how she's from her obscurity freed.

Disaster High

and Ser. w. L.R.

**Longer Aspects.**

[illegible]

**Astrological Conjectures,  
or Observations**

☐ \* Formula nunquam repetenda est bona.

6/19 This is a time only fit for

△ Council, nor for Action, and

8 ☐ It is impossible the most

10 prudent and deliberate in-

deavours of the best of  
Councillors.

△ Councils should gain the good opinion of

7 good opinion of the whole Kingdom.

Kingdom, we have many  
honorable Confucians.

5 notable Configurations the latter half of this Month.

ter half of this Month, and  
most of them of rail.

most of them of evil Ten-  
dency. I fear more than

8. Efficiency. I fear more Plotting  
and secret conspiracies.

2 and secret contrivances to  
eff: a much mischief. Th

ent: it much mischief. The  
great God of Heaven defend

great God of Heaven defend  
us from all dangers.

us from all dangers, vain  
 Δ fears, as well as false hopes.

8 for now some disturbed s...

☐ 8 for now some disturbed Spi-  
rits, and crazy brain'd Per-

19 sons, will be in Action per-

1910s, will be in Action, per-  
haps to their own Ruine.

\* For villany is so much in

\* For villainy is so much in  
4 fashion with them now that

4. cannot with them, now that  
they think it absurd to b. veru

ous. Quarrels, Duels, Robbing,  
Murders, &c.

Murders, &c. we may expect daily to hear of and

daily to hear of, and many o  
ther things might be said.

Other things might be said.

# December hath xxxi days

Farthest distant from the Poles, when the Sun and Moon being conjoined or opposite in the Equinoctial, produce the greatest Spring-Tides, and the subsequent Neap-Tides, being produced by the Tropical Moon in the Quarters, are always the Least Tides; whereas in June and December, the Spring Tides are made by the Tropical Sun and Moon, &c.

I. **K** Ind Friends, once more by Heavens Bounty I appear!  
 And have with Pains survey'd the Circling Year;  
 Up to the Starry-Orbs my Fancy flew;  
 Where, at one Glance the Univerſe to view,  
 There All for which Fond Mortals toy and fight,  
 Seem'd leſſer than a Mole-hill in my ſight.  
 From that bright Seat, methoughts, I laught aloud  
 At the vain Labours of the Buſie Crowd;  
 Whiſt ſome, by fierce Ambition bur'd,  
 Make it their only work to embroil the world.  
 Accept, I pray, ſuch Caution for your good,  
 As from Heavens Miſtick Text are underſtood:  
 What's fit is Told, and for the reſt, my Prayers  
 To him that over-rules Ill-boding Stars,  
 Shall be, That Ills may be diverted from us,  
 And all Repent. So Lord have Mercy on us.

II. *Aſtrological Observations upon the Quarterly Ingreſſes of the Year, 1692.* ☉ in ♊, 1691. December 11th, at 1 h. P.M. ☿ C. ♊ 14. Aſc. ☿ 4. ☾ ♌ Δ ♋, ☿ ☿ ♋ ad vacuum Δ ♋ ♋. ☿ ☉ ♋. ♌ 6 ♌. ♋ 6 ☿. ♌ 16 ♌ ♌ ♋ 8 ♊. ♊ 22 ♊. And thus are the Planets poſted, as thoſe that pleaſe to ſet the Figure, may, for their own ſatisfaction.

**I**N this Figure of the Winter-Quarter, that which is moſt conſiderable is the *Trine* of both the Fortunes, and the Sun is haſting to the *Trine* of Jupiter alſo; which promiſes a quiet ſerene time in general, during the *Winter-Quarter*; but the Month of *January* being attended with ſuch a Crowd of Configurations (as before I have noted) muſt needs prompt ſome perſons to be active enough every one in his proper Sphere, but more abroad than at home: 'Tis usher'd in with a *New Moon*, but a day or two before the *Solſticial Ingreſs*, and that makes it the more conſiderable: And now many notable Councils in moſt parts of *Europe* will be held, to debate Matters of more than ordinary Concernment, in every Individual Nation and Kingdom, of which we may expect ample Information in convenient time. I doubt not but we in *England* remain in Peace and much Tranquillity, as Loyal Subjects ought to do; I pray God continue the ſame.

*Astrological Observations, 1692.*

same. But If there be yet any dissatisfied Spirits amongst us, that will be still uneasy to themselves, in disturbing the Government, by Plotting and Conspiracy, let them enjoy the Merits of their Deserts. 'Tis Time is the Touchstone of Truth, and we know that the advantage of Time and Opportunity leads Humane Actions, as it were, by the hand to their perfection. The Weather this Quarter should be various, with much Wet or Snow, high Winds, *Westerly* and *South-west* mostly, intermix'd with some cold *Northern* Blasts. But of this *Quarter*, both as to Weather and Mundane Affairs, see more in the *Kalendar* part. The Diseases usually Incident this *Winter-Season*, should be Gripping of the Guts, Dry Coughs, Scurvey, Dropsie, Sore Throats, Convulsions in Children, Tumours in the Legs and Knees, &c. And thus much upon the *Winter-Quarter* or *Tropical Season*, which I shall conclude with these Poetical Strains:

Look up, my Friends! see how the Planets Reign:  
What News from Tripoli, from Rome, from Spain?  
When dare the Turks o're Germany advance?  
And who's the Man must crush the Pride of France?  
But Hush with these things, what have we to do?  
Does the World still go Mad — e'en let it go.

III. **I**N the next place I shall consider the *Spring-Quarter* which according to a New and Correct Theory of the Planets Motions, will Commence, viz. *March* the 9th. 3 h. 30 min. P. M. M. C. & 25 Asc.  $\text{III}$  4 d. later by above half an hour than the *Caroline Tables* give it. This New Theory is grounded upon very curious and exact Observations; and Tables are now composing from the same, more exact and consentaneous to the Heavens than any Extant, and may shortly be published by a loving Friend of mine, and a Person well known to most of the best Astronomers in England, whose Name will be prefix'd to the Work.

In this Figure I find Three Planets Angular, amongst the rest, the Planet Mars in *Medio Caeli*, the Moon in *Aries*, hasting to the Sextile of Mars and Conjunction of Venus: This shews Courage both in Prince and People, and that all Matters should succeed well in the general this Quarter, and probably all the

Year; for the *Sun* hastens to a *Triumf* of *Saturn* and *Venus*, in perfect *Sextile* to *Mars*, *cum multis aliis*. This *Spring* we may expect Matters of very Transcendent Importance, and great Concernment, as to National and publick Affairs, will fall under serious Consideration. But I would have no person mistake me, or think that I affirm these or any subsequent *Configurations* of the *Planets* to be the only Immediate Causes of the succeeding Actions in the world (whether good or evil); No, I conclude, and know by experience, they are the Signs and Fore-runners (in a Natural way) of such Actions or Accidents which do very much sympathize or correspond therewith. I see no Reason in Art but we in *England* may live in much Tranquillity and Peace, if we will but endeavour so to do, and resolve to be ruled by Reason, and quietly submit to the prudent Government of our Superiours, as in Duty we are bound, without complaining and repining without just Cause for the same. The Diseases of this Quarter will be many, and too many of them, I fear, prove both violent and mortal: Nor are the Wars of *Europe* yet at an End; There seems to be great Disputes and secret Whisperings amongst the vulgar sort in most Nations of *Europe*, and we may also expect many Dangers and Tribulations will attend their Persons. *Paracelsus* tells us, That many studious people, searching into the Secrets of Nature, may by their good *Genius* have Mysteries revealed and discovered unto them. And most persons agree, that the Heavens are a large, *Expanded Volum* in which may be read many grand Mutations (as Effects in the Bosome of their Causes, or Events pre-notified by certain Signs) long before they are brought into Act here on Earth. — But the Natural Grounds or Dispositions of the Coelestial Bodies, which like Mediate Links in the Grand Chain of Secondary Causes, have produced, or at least co-operated in the Production of these our late Disturbances, or the extraordinary *Phenomena* which the Almighty makes use of to pre-signifie his Will and Pleasure, are like *Beacons* to admonish the World of such Impending Chastisements, and cannot but most certainly deserve our more curious Observation and Enquiries.

Now since some late Discourses have been spread, concerning something Material that Mr. Lilly has written concerning what may happen in *Europe* in future years, I thought it might not be

he ungrateful to, such as never saw those *Prophecies* and *Prædicti-  
ons*, here briefly to Insert some of those the most considerable.  
In his Almanack 1654. treating of the *Comet* that appeared in  
the year 1652. he says thus: viz. 'And it is also evident unto  
' me, That the Dominion or Government of all *Europe* shall in  
' a manner come into the hands of one only Eminent Person e're  
' the year of our Lord 1692——&c. And a little further he  
goes on thus: viz. 'And if we consider and very well observe  
' what Person of Quality is now born, having either Relation  
' to this *Comet* in the Tenth House of his Nativity, or place of  
' the *Sun* or *Moon*, or if we observe the position of Heaven at  
' his Birth, in relation either to the *Eclipse* of the *Sun* in 1652  
' or in 1654. or what Concurrence it hath or had with the for-  
' mer *Conjunctions* of *Saturn* and *Jupiter*, or will have with the  
' Third *Conjunction* of *Saturn* and *Jupiter* in 1663. [to which  
' might have been added that *Triple Conjunction* of the Superi-  
' ours in *Leo* in 1682 and 1683.] We may, I say, assure our  
' selves, That that Man, or the Man so qualified by Birth, shall  
' act his part upon the Stage of *Europe*, with so much of Divine  
' Assistance, that it will not be in the power of any *Prince*, *King*,  
' or *Nation* to resist him——And he further adds, 'Yet he  
' must Dye not Aged, and only begin that Dance which another  
' must conclude——Who or what Person he means, let  
the Curious judge.

Moreover in his Book Intituled *Monarchy or No Monarchy*,  
Printed in 1651. at *London*, he gives us an Account of many  
famous *Prophecies*, with their particular Verifications, worthy  
the Consideration of the Judicious; and in the close of page  
62. thereof, he writes thus: viz. 'Were I intended to weary  
' my self in relating the woful Calamity which shall in less than  
' half a Century of Years befall the *FRENCH NATION*,  
' I might write a large Volume thereof, and tell them, a certain  
' Prince, as Religious as a *Turk*, shall over-spread that Peoples  
' most Fruitful Territories, and all those Wars and Desolations  
' will be occasion'd by the unruly Nobility, who by their Civil  
' Dissentions shall occasion the Ruin of the *French Monarchy*;  
' and if you will know near the time of this great Mutation, it  
' shall be when a certain King called *Henry* is twice made King,  
' and a Duke of *Florence* turn'd Protestant. And so he goes on  
in page 63. with a *Latin* Prophecy, which begins thus: 'Re:  
Francis

## Astrological Observations, 1692.

*Francie depellatur à suis finibus à propriis, subditis, &c.* But in English thus—The King of France shall be driven from his own Coast and Confines by his own Subjects; for he will exercise very great Tyranny against them and the Church of Christ; being instigated thereunto by the Bishops and Romanists, who shall seduce him, and betray him traiterously for Money, &c. And in page 70, 71, & seq. he tells us of a wonderful Year of the World, wherein are most strange and amazing Monthly Predictions, but the certain year it self not to be revealed; yet such Matters will certainly happen therein before its grand Catastrophe. Those that would see more, I refer them to the Book it self. And thus much from that famous Author. I leave it to the Consideration of all Inquisitive Ingenious Persons to make their Best Construction thereof, since now we live in an Intelligent, and no less Critical Age. There are also at the End of the aforesaid Book his Hieroglyphicks, no less Mistical, and shews the various Revolutions of Europe, even to the World's End; but no body as yet has given a Genuine Interpretation of them all; some he has Explain'd, or Illustrated in his Almanack 1655, and others in his *Annus Tintobrus*, to which I refer every Reader.

Lastly, to conclude this Quarter, I fear a sickly Season approaching; for many Aged Persons now (amongst others) make their Exit out of this World; and Death now in good earnest designs to feed upon Dainties; and therefore in all thy Glory *Memento Mori*. Other things might be intimated, but I shall shut up all with these significant Lines:

*What Sot would go plot, when his Lot is a Rope.  
What Fools will be Tools and Slaves unto Knaves for hope;  
The Wise that wear Eyes will despise such Temptations, sons  
And learn to discern their own Peace must cease with the Nati-  
Quiet is Dyed, those that try it shall find—  
More sound, than is found in a Crown by a restless Mind.*

## Astrological Observations, 1692.

IV. Sun in ♋, June 10. 3 h. 20 m. P. M. 1692. M. C. ♏ 18.  
 Asc. M. 5. ☉ 23. ♀ ☉ ☉ ♋. ☾ 18. ♉. ♄ 6. ♀ ♋. ♀ 6. ♀.  
 ☿ 19. ♏. ♀ 15. ♏. ♀ 16. ♀ 13. ☾. ☾ ☐ ♀ ad ☐ ☉.  
 ☿ ♄ ♀. \* ♀ ♀. \* ☿ ♀.

**T**Hus stands the Position of the *Summer Quarter*; and the most Remarkable thing therein is the hateful *Opposition* of the Superiour Planets *Saturn* and *Jupiter*. Now, or near this time expect *Suspicious Councils*, and very mutable Actions of great Concernment in hand in the *Macrocosme*; and they will be manifested partly in Civil Affairs and common Transactions, and partly in *Martial Concerns*, and this perhaps suddenly, when least expected. Also *Dissolutions* of great *Councils*, Breach of Leagues and Friendships upon the least Occasion given. Moreover, we may justly fear (if not certainly expect) many *Sicknesses*, and those more than ordinary, *Fevers* of all sorts, and some of them extream violent and dangerous: But I do not desire to affrighten the People, nor dare not be absolutely positive, I only make a Probable and Rational Conjecture——Let us but examine *History*, and study the *Secrets* of the *Stars*, and we may in a great measure inform our selves, that some miraculous Change in several Kingdoms and Countries of the *European World* is drawing on, or very near Manifestation; and we daily find that Mankind in general labours hard, and toyls to little purpose ——

The aforementioned Position and *Configurations* of the *Planets*, do in my Judgment menace the *Turks* and *Tartars*, and such like *Tyrannical British Infidels*, as have lately been so active to destroy the *Christians*. I say, according to the Series of Natural Causes, and the Effects thereof, there should be many *Commotions* and *Confusions* amongst them, also *war* and *Bloodshed*; and 'tis to be feared many in *Foreign Parts* will find a sharp *Summers* work on't. And of such Matters as these, by consulting the *Canons* of *Astrology* and *Experience*, we may be able to make a Modest Conjecture, and yet I dare not pretend to be so much a Favourite of the Dear *Urania*, as to be permitted the Honour of appearing in her *Presence-Chamber* and there be made happy with her obliging Smiles, with some of the rest of my Brethren

*Astrological Observations, 1692.*

thren: Yet rather than be totally excluded, I'll content my self to be one of her meanest Servants and Admirers, and consult the Labours of some of the best of her Sons, thereby to Improve my self in Art; and if I cannot attain to perfection, let me assume to call my self a Well-wisher, &c.

And thus I may conclude, that the World stands (as it were) amaz'd, suspecting its own Fate— For things of Wonder are not accomplish'd without long and serious Consideration; and an Industrious Diligence never makes too much haste. If so, let us compare our selves with those Blessings we enjoy, tho' they fall into our Mouths but like Dew or Rain by Drops, since those that greedily gape after a Flood may be choak'd with a Foundation. In the greatest storm of Ill Success in our general Affairs in the World, let us endeavour to carry fair and pleasant weather in our Faces, or a clear Countenance in a cloudy Brow— We know the common People judge of Persons and Things by the Issue and Event— and the thing call'd Success is the Bawd to Vulgar Admiration. But I shall end this *Totum* with the *Poet*, who says, viz.

*Let us esteem those Men that do oppose  
Both Foreign Lyons and Domestick Foes.  
Now is the time to shew our selves like Men,  
And loving Loyal Subjects too; and then  
May Laurel Wreaths, and Never-failing Bays  
Still Crown our Heads in these our happy days.*

V. Sol in ♈, Sept. 12, 1692. 6 h, 40 m. mane, M. C. 21. II.  
Ascend 23. ♈ 16. ☉ 0. ♎ 23. h 6 2. ♋  
20 II. ☽ 19. ♊ 23. ♋ 24. St. 8 8. ♎ 1  
♈ 23. ♋ 24. ♊ 23. ♋ 24. ♎ 1. ♈ 23.

**A**T the Commencement of this *Autumnal Quarter*, we have a very favourable position of the Heavens, as those that please may (if able) examine. From whence I shall deduce this Judgement (Consideration being had to other Concomitant Configurations). The Actions of this Quarter begin with very fair Preferences, and the People are now again in expectation of very hopeful proceedings for the General Advantage of the whole Nation; and, in my Opinion, here seems little or no

Con-

*Astrological Observations, 1692.*

Contradictions, during this Quarter, in the great Affairs of the Publick; but very mature *Councils* are continued, to the general satisfaction of all Loyal Persons, and true-bred *English* Hearts. But if some discontented hot-brain'd persons will be venting the Gall of their Turbulent Spirits, and thereby bring Trouble upon their own Heads, let such know, that the Evil they think to drive away by an Indiscreet Revenge, will return upon them with Interest; for generally it so happens amongst us, That after a Shower of Wrath has been poured out, immediately follows a Flood of Grief. It is therefore the sweetest Revenge (if possible) to forget an Injury, whether real or supposed. But to proceed, I judge we may rationally expect the Actions of this Quarter to be of great Concernment in Civil Affairs. And now many deserving Persons are encouraged, and have Honour conferr'd upon them. Others are as generously rewarded.

The *Merchants* have now good Hopes of very considerable Returns, not only from the *Eastern* but *Western* Parts of the World. Many high and (I may say) Transcendent Consultations and Actions are agitated, not only in *England*, *France*, *Holland*, but also in *Italy* and *Germany*, and many other Eminent Places in *Europe*. *Jove* is a Benevolent Planet, and tho' now in Detriment, yet he is in *Trine* to *Mercury* (which is no Inconsiderate Planet in such Matters), and (which is observable) the Two Misfortunes, *Saturn* and *Mars*, are in *Trine* at the beginning hereof. Whence I judge many Sober Generous Worthy Persons (as well as others), such who have great Power and Command in several Eminent Places, and qualified with Knowledge and Understanding in the Affairs of the World; also Men of sound Judgment in the Laws of Nations, and some very Learned, perhaps some *Orthodox* and Religious Prelates will be very active, and use their utmost Endeavour to regulate such Disorders, Laws, Constitutions or Edicts, either of Princes or Commonwealths, as have heretofore or at this time been the Occasion of Offence. And this I hope the high Hand of Providence, which orders and disposes all things, may bring to pass, for the Honour of those Noble *Princes* and Worthy Agents who labour in so good a Work. Many of our Nation perplex themselves with Fears of an Intended Invasion of the *French King*, and that we shall unhappily fall under his Yoke,

*Astrological Observations, 1692.*

Yoke, and many strange Disasters to that purpose. — But I cannot discover any such Danger from *Natural Causes*; the *Configurations* of the *Planets* and *Stars* (who are God's *Celestial Ministers*) menace us with no such thing, but rather the contrary, as has been already intimated.

By this time we may expect a large Account of all those *Noble Transactions* that have been carried on with great *Courage* and *Conduct* throughout *Europe*; and for our own *Kingdom of England*, I doubt not but we still continue in *Splendor*, *Peace* and much *Plenty*, which I pray God continue.

In fine, There will be many healing Consultations this Quarter, so that in Reality there should be but small Cause of Complaint; yet in many places (if not most) of our Nation, there will be a secret kind of Murmuring amongst some of the middle sort, which soon ceases again, and therefore runs not so far as to end in Confusion.

*But most Men when they attempt one Vice to shun,  
into the Contrary do madly run.*

*VI. Of the Eclipses that will happen this Present Year,  
1692.*

THE Luminaries will be no less than five times Eclipsed, Three times the *Sun*, and Twice the *Moon*; the first of the *Moon*, *January* the 23<sup>d</sup>, near Two in the *Afternoon*, and therefore invisible to us. The Second is a very small Eclipse of the *Sun*, *February* the 7<sup>th</sup>, near five in the *Morning*, and not visible in our Hemisphere. The Third is a Visible Eclipse of the *Moon*; and according to *New Tables*, not yet Extant (perhaps the most correct of any), the Calculation is thus: viz. *July* the 18<sup>th</sup>, the Beginning 13 h. 39 m. 22 sec. The True Opposition 15 h. 11 m. 46 sec. the Middle of the Eclipse, or greatest Obscuration 15 h. 16 m. 38 sec. the End 16 h. 53 m. 54 sec. Digets Eclipsed 10 d. 34 m. 38 sec; Lat. of the ☾ at Beginning M. D. 35 m. 45 sec. Lat. ☾ at the end 18 m. 29 sec. The Fourth Eclipse, Calculated from the same Tables, will be of the *Sun*, *August* the Second, and visible, if the Air be clear. The Beginning 21 h. 6 m. 22 sec. (that is the 3<sup>d</sup> Day about

## Astrological Observations, 1692.

about Nine in the Morning) The Visible Conjunction 21 h. 51 m. 42 sec. The Middle, or greatest Obscuration 21 h. 55 m. 54 sec. The End 22 h. 46 m. 0 sec. Digits Eclipsed on the South side 3 d. 31 m. 56 sec. The Fifth and last Eclipses should be of the Sun, on the 27th of December, about Two hours Afternoon, it falls in about Seventeen Degrees of the Tropical Sign Capricorn; but being a very small Eclipses, it will very rarely any part of it be visible to us; and therefore no more need be said thereof.

Eclipses have doubtless their Events both upon Man and Beast, and never signifie any thing of good: but those that are Invisible to a Countrey are less powerful. Let us observe narrowly what Events succeed these; which is all I shall say of them in this place.

VII. **T**He Learned *Guido*, Folio 528. advises us to consider in our Annual Judgments, of particular Places and Persons therein, in these words———*Cui Climates, præsist quilibet Planeta, &c.* Consider and have regard to the Planet that shall preside over, or govern each Climate, and observe in what State he stands; for the General Accidents of that Climate shall be suitable to his Existence, &c. And according to the Direction of this *Aphorism*, I shall give a brief *Astrological Conjecture* for this present Year, of these following European Kingdoms and Countries.

**M**R. John Russel, Physitian and Occulist, his Spirit of Scurvy-Grass, both Plain and Purging, he affirms to be the most strong, piercing and powerful Elixir of Scurvy-Grass now exposed to Sale. Those that buy it may taste it; and if not so, may return it without Loss; being fit for the Closet of any Physician, and is admirable in the Scurvy, Dropfie, Gout, and most other Diseases. Also his Lozenges for Colds, Coughs and Consumptions; with his Famous Powder that Kills all sorts of Worms. Sold at his House at the Two Blin Posts against Grays-Inn in Holborn. Each sold for 1 s.

*Astrological Observations, 1692.*

1. **ENGLAND**, The *Moon* and *Venus*, is in *Aries* in the *First Figure*, and *Mars* Potent in the *Mid-heaven*, therefore the Heavens seems to smile upon thee; It may be hoped thou wilt flourish with a good Trade, also Peace and Plenty, in spite of the worst of thy Enemies; for, in my Opinion, thy Glory and Happiness will rather Increase than Diminish—Improve thy Talent wisely, and thy Fame may be most Splendid.

2. **SCOTLAND**, Learn to be wise, and cherish no Domestic Differences appertaining either to *Church* or *State*; Submit to your Superiors, and be not rash and head-strong: If you desire to be happy, and live at peace, Conform to the Government that protects you, and you may conclude then, that the *Crab* of Misfortune will *crawl* backwards.

3. **IRELAND**, Thou hast lately tasted of a Dire Cup of Affliction; but *Saturn* has now left the Sign *Scorpio*, and *Jove* is posited in *Taurus*, your *Horoscope*; therefore it may be hoped thy Sorrows are drawing to a Period, and now you may expect to see better Days, after all thy late Confusions, and the Death of many Thousands of thy People. Thus Wars and Rumors of Wars has been thy Portion: Repent, and be wise betimes; lay hold upon Mercy, and be once more happy under a most Merciful King and Queen, and the God of Mercy will for the future protect thee.

4. **HOLLAND**, Thou art happy, and like to be so, in spite of thy most potent Enemies: The Heavens shower down their Benevolent Influences upon thee; the *Moon* is hastening to a *Conjunction* of *Venus* in *Aries*—Be kind to *England*, and doubt not but you will augment your Honour and Fame. Behave your selves Nobly now, and you will gain the Love of most Nations; you are the Traders of the World, and all persons cannot but commend your Pains and Industry. Now go on and prosper——

5. **FRANCE**, *Mercury*, thy Ruler, is in Detriment; Pride must have a Fall, thy *Grandeur* will Decline: be careful to prevent Insurrections at home; the whole World is against thee; thy

*Astrological Observations, 1692.*

thy King cannot but have both his Head and his Heart full :  
Make Peace with thy Neighbours, and spend the rest of thy  
Days in a retir'd Life, &c.

6. *SPAIN* is threatned with a Plague, or some great Sick-  
ness, or other Disaster; for *Saturn* will be in the *Horoscope*  
thereof many Months; 'tis time to look about thee, and be  
wise.

7. *ITALY*, If according to Authors, thou and thy chiefest  
City be under the Sign *Leo*, I find that arising upon the Cusp  
of the 12th, with *Cancer* thereupon; therefore a Treacherous  
Year is threatned: Thou must expect many Enemies, both  
publick and private; and consequently the Papal Power in  
danger of great Prejudice; tho' not a total Subversion and Ca-  
tastrophe—&c.

8. *GERMANY*, Thy Valiant *Emperor* is high and lofty in  
his Resolutions and Actions; insomuch as the World will ad-  
mire his Attempts against the *Turks*, and all his Assistants, who  
must shortly be glad to comply upon any Terms.

The Conclusion.

Nature is free, exacts no mighty Rent,  
Supply her Wants, and she'll be well content :  
The Poor, the Rich, Nobles and Mean, shall have  
E're long, one common Lodging in the Grave :  
There all our Frowds, and all our Wants shall cease ;  
The Conquering Worms Reduce us all to Peace.  
Secure an Interest in the other World,  
And let this, as it list, be Toss'd and Hurl'd.  
He's Great, and Rich enough, that well doth Dye,  
And can with joy expect Eternity.  
This, Reader, is the best News I can tell,  
Think on't, and practise it; and so sayes well.
